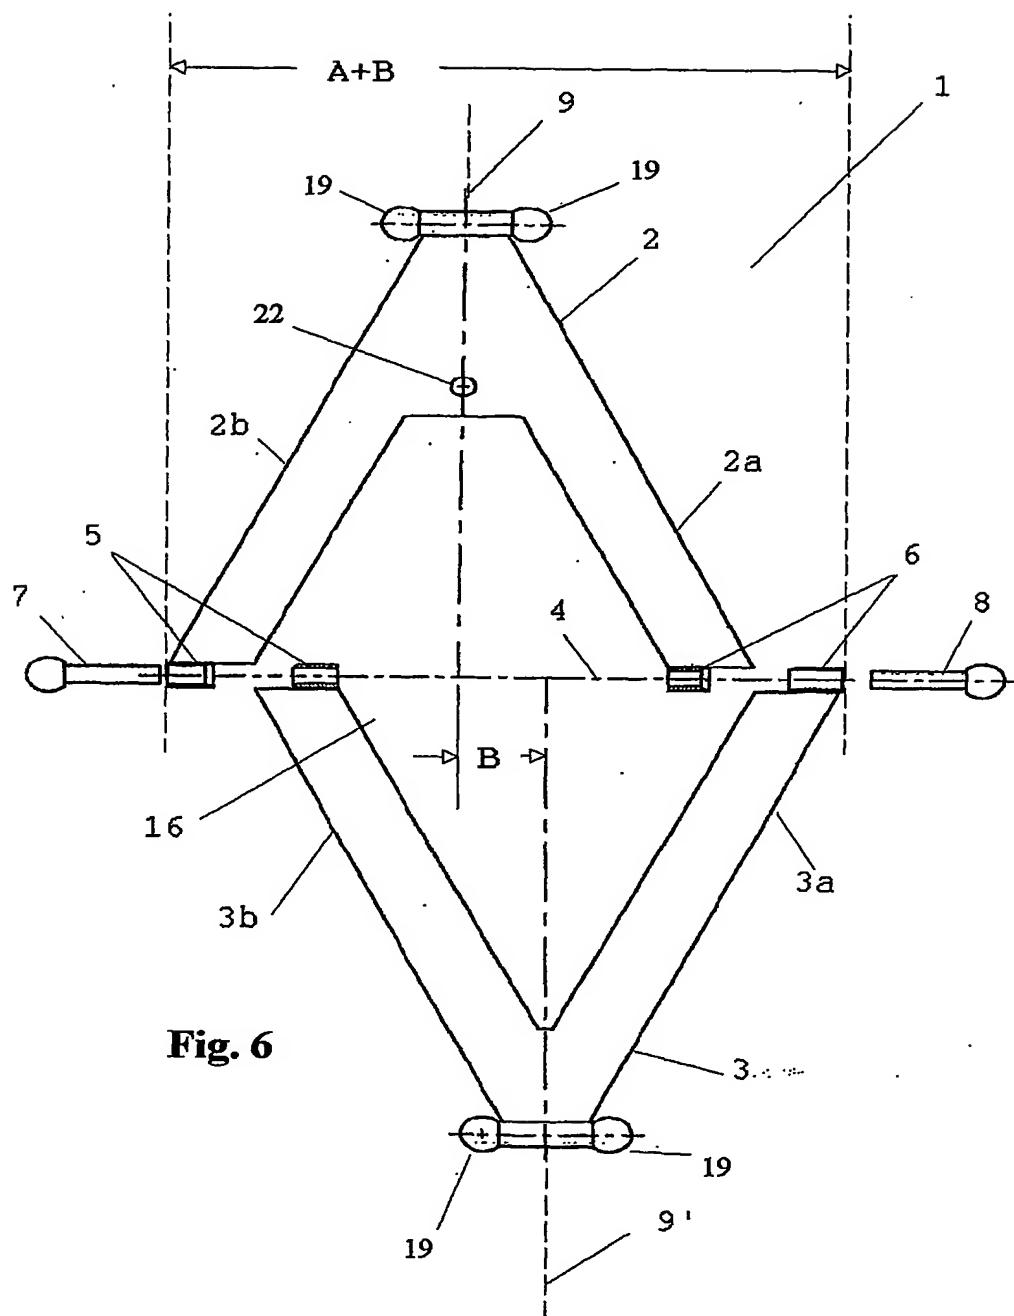

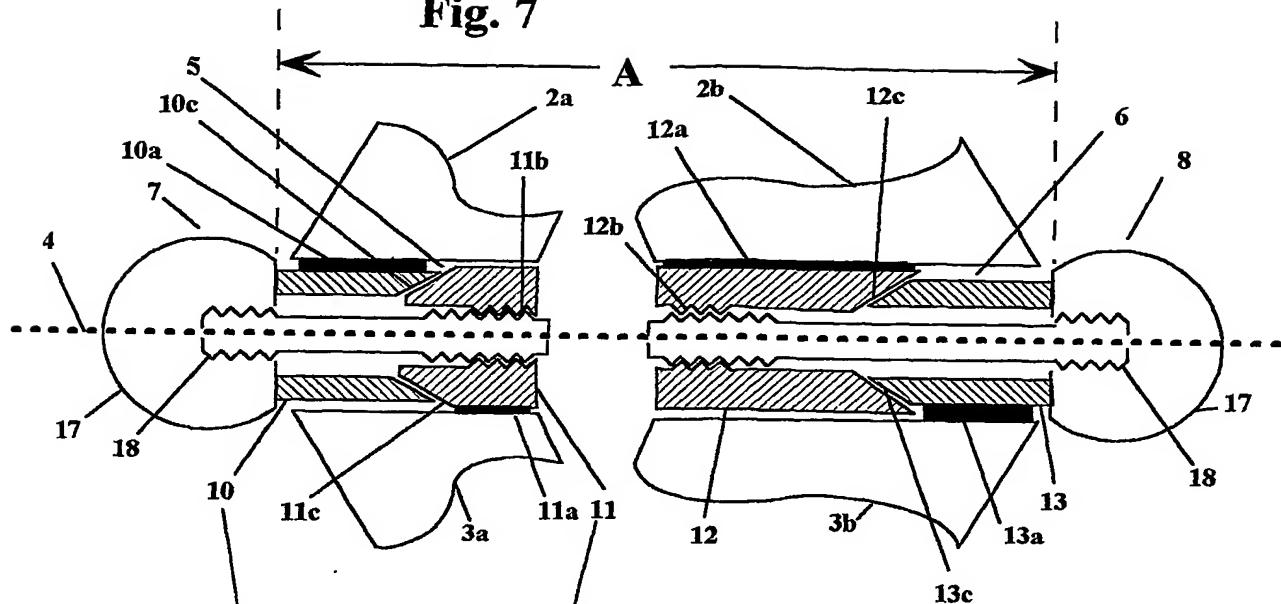

Fig. 7

A cross-sectional view of a dental instrument assembly. The assembly includes a handle 8 with a grip 17 and a head 15. The head 15 features a central channel 6 and a transverse slot 15c. A curved blade 14 is inserted into the slot 15c, with its proximal end 14a resting on a shoulder 2b. The distal end 14b of the blade 14 is positioned to engage a workpiece 11a. A support structure 3b is located beneath the handle 8. A circular component 18 is attached to the handle 8. A dashed line indicates the longitudinal axis of the handle 8.
